CERTIFICATE

This is to certify that the Henderson Plant uses approximately 70% of recycled material by weight in the manufacturing and assembly of various carbon steel, cast iron, and forged steel products. This estimation is based upon an analysis completed by surveying the vendors of our purchased raw materials and in-process subcomponents, noting the percent of each type (where given), and then comparing the amounts of each of the material types we acquire.

Note that this percentage does not include an estimation for percent of recycled content comprised in fasteners as the supplier could not provide an estimate.

Henderson's Quality System is registered to ISO 9001:2000 and assessed to BS 5750: Part 2, ISO 9002 and EN 29002. A copy of the current certificate is available upon request.

Products manufactured and assembled at Anvil International, Inc. located in Henderson, Tennessee, USA are done so through the quality efforts of Local Union 854, United Association of Journeymen and Apprentices of the Plumbing and Pipe Fitting Industry of the United States and Canada, AFL-CIO.

Respectfully Submitted,

Brian Buck, P.E.
Manager, Engineering and Quality Assurance
