## The Dropmaster Benefit - Compare the capabilities.

	Shop Vac or Dual Vac	Dropmaster
Column of Water	Restricted	Unlimited
Height	Restricted	Unlimited
Distance	Restricted	Unlimited
Odor	Restricted/Remaining	Removed
Air circulation in sprinkler system at all times	Necessary	Not Necessary

## The Dropmaster Technology

Dropmaster removes all odor and water from a sprinkler system by creating a siphon effect when sprinkler heads are removed or the system is breached.

The Dropmaster will maintain CFM's to stop water and odor from escaping during removal.

## The Dropmaster Equals:

**Savings!** Most contractors report labor savings up to 50% when using the Dropmaster, some have reported as high as 80%!

### Satisfied Contractors!

The Dropmaster eliminates the foul odor that escapes sprinkler piping when working on sprinkler systems. Dropmaster will eliminate odor and customers can continue their daily routine without being interrupted.

## Automatic Draining System Now Standard
